GRADUATE ASSISTANTS AND POSTDOCTORAL RESEARCHER OPPORTUNITIES

The University of New Mexico has several immediate openings and opportunities available in a variety of research and development areas:

- Particle accelerator science and engineering
- Data science/Machine Learning/Artificial Intelligence including controls and data analysis
- FPGA programming for controls and detector systems
- Quantum Information Systems
- Physics of Materials
- Mechanical engineering (including materials & solid mechanics and dynamics and control)

For the postdoctoral researcher – Ph.D. in ECE, ME, CS, Chemistry or Physics; For the Graduate Student – Bachelor’s in EE, ME, CS, Chemistry or Physics. Master’s degree preferred

If interested, please send Curriculum Vitae (including active research projects and publications) to:

Sandra G. Biedron, Ph.D. ECE and ME biedron@unm.edu
